

AYOUB BOULHADA

Junior Full-Stack Developer | IT & Business Applications

Casablanca, Morocco | +212 6 81 08 87 46 | Boulhadaayoub@gmail.com | Open to relocation across Canada

PROFESSIONAL SUMMARY

Junior Full-Stack Developer and IT Specialist with professional experience building internal business applications using React.js, JavaScript, Node.js, Express.js, MySQL, React Native and Tailwind CSS. Experienced in document management, HR systems, Progress OpenEdge development, Microsoft Dynamics 365 Business Central customization and day-to-day IT support. Strong in debugging, problem solving and adapting to existing systems, with a multidisciplinary background in computer science, electrical engineering and mechanical engineering.

PROFESSIONAL EXPERIENCE

Junior IT Specialist / Full-Stack Developer

Aug 2025 - Present

ISMAWOOD | Casablanca, Morocco

- Develop internal business applications using React.js, Vite, JavaScript, Node.js, Express.js, MySQL and Tailwind CSS.
- Designed and deployed an electronic document management (GED) system to digitize the company archive, with configurable categories, subcategories, services, profile types, document types, filtering and search.
- Extended the GED with a React Native mobile application for direct document scanning, archiving and retrieval from a smartphone.
- Developed and deployed an HR leave/exit management application used by HR, with role-based access and automated leave-balance and seniority-leave calculations.
- Implemented scheduled nightly Cron processing to verify and update monthly and yearly leave rules; the React Native mobile extension is currently under testing.
- Develop with Progress 4GL on Progress OpenEdge 10.2B08, creating pages, models and scripts that extract operational data into dedicated tables for analytics.
- Customized Microsoft Dynamics 365 Business Central in AL by consolidating data from multiple source tables into a centralized analytical table for reporting and faster business-state extraction.
- Provide PC hardware/software support and mentor 3 interns on software-development and data-analysis projects, including debugging and project organization.

Census Enumerator

2024

Haut-Commissariat au Plan (HCP) | Morocco

- Independently managed an assigned census zone of approximately 1,000 households during Morocco's Population and Housing Census.
- Conducted door-to-door interviews and entered household information digitally using a tablet-based census application.
- Worked within a four-person field team, with each enumerator responsible for a separate geographic zone and daily data completion.
- Completed approximately 2.5 months of in-person and online preparation before the one-month field operation.
